Professional Summary

Aspiring programmer with great communication skills ready to make an impact on the workplace. Passionate about creating useful and entertaining software for others and helping others with their technology based problems. Now that I have graduated I am ready to narrow down what field of work I wish to enter and am ready for new experiences. Motivated and enthusiastic to enter the workplace.

Education

BACHELOR OF SCIENCE | 2018 | HUMBOLDT STATE UNIVERSITY

· Major: Computer Science
· Related coursework: software engineering, telecommunications and networking, web apps using databases, database design, computer security, python programming, operating systems, architecture
· Graduated in May of 2018
· 3.41 overall GPA, 3.52 Major GPA

Skills

CODING

· Avid coder that has skills and experience in: C++, Python, Oracle SQL, JavaScript, Meteor, node.js MongoDB, HTML. Most recently I was in a semester long group project in which we had to create a piece of software. We created a simple version of a matchmaking system using Meteor and MongoDB to make website along with some HTML and JavaScript.

COMMUNICATION

· In any group project communication is the most important factor in delivering a polished final product. I always make sure to keep everyone talking with one another so that all of the pieces are brought together in a professional manner. I will bring this attitude to the workplace because no matter where you work constant communication will create a better product.

MISCELLANEOUS

· Other skills include proficiency with: multitasking, time management, work distribution, self-initiation
